Web applications

Scoodle for Secondary teachers

Web application

Role:

Research, UX Design, UI Design

Scoodle for Secondary Teachers
Educational Platform

Role:
Research, UX Design, UI Design

Summary:

Scoodle is the online platform of Plantyn, a leading educational publisher in Belgium. They provide online materials and planning tools for teachers.

I was responsible for the total redesign and creation of the new classroom concept for secondary education. I also created a style guide for Scoodle and turned it into a responsive web application.

Scoodle for Students

Web application

Role:

Research, UX Design, UI Design

Scoodle for Students
## Educational Platform

---

Role:
Research, UX Design, UI Design

Summary:
Scoodle is the online platform of Plantyn, a leading educational publisher in Belgium. They offer online exercises, and ebooks for students.

In this project I was responsible for the total rethinking of the student platform. It meant a total redesign of the features based on our research. Also to turn the platform into a responsive web application and apply the new styleguide.

Business applications

Scoodle Authoring tool

Business application

Role:

Research, UX Design, UI Design

Scoodle Authoring Tool
CMS tool

Role:
Research, UX Design, UI Design

Summary:
Plantyn is a leading educational publisher in Belgium. The company is currently undergoing a digital transformation.
As part of this transformation they wanted to modernise and rethink their way of publishing online content.

I was asked to create a CMS system for the company.
I was leading the entire design process from research, through UX, and UI design till the prototypes and testing.

BNP Paribas

Business application

Role:

UX Design, UI Design

BNP Paribas Fortis

Microsite, online survey

Role:

UX Design, UI Design

Summary:

BNP Paribas is market leader bank in Belgium. They offer wide variety of financial services to their customers.
In this project we were addressing their business customers. As cybersecurity became a major threat recent years, BNP Paribas decided to raise awareness.

We created an informative micro site with an online survey, to give suggestions to companies how to raise their security.

iReservatie

Business application

Role:
UX Design, UI Design

iReservatie
Reservation management tool

## Role:
UX design, UI Design

Summary:
Our customer OOOC is a nation-wide chain focusing on sport events and managing sport fields. We were asked to create a tool for them to manage their reservations.

I was responsible for UX design and the visual design of the application. The application enables them to record, manage, edit reservations for their different sport fields and to communicate with customers about their booking.

Mobiflex

Business application

Role:
UI Design

Mobiflex
Hospital management tool

Role:
UI Design

Summary:
Mobiflex is an application used by several major hospitals across Belgium. The app was created to help employees manage the administrative workload of hospitals such as entering, organising reports, manage examinations, appointments.

My role was to create the visual identity of the application. The goals was a very clean, calm interface design which fits into the world of healthcare.

Monument Real Estate

Business application

Role:
UI Design

Monument Real Estate
Project management tool

Role:
UI Design

Summary:

Monument Real Estate is a market leader in real estate projects in Belgium. They are running several private and commercial housing projects all around the country for 20 years now.

Our team was asked to create a project management tool for the company, where they can organise all their documentation.
I was responsible for the visual design of the application, where the main goal was visual clarity and close harmony with the brand's style guide.

B2B websites

Degralia

B2B website

Role:

Research, UX Design, UI Design

Degralia website

Responsive corporate website

Role:

Research, UX Design, UI Design

Summary:

Degralia is a collaboration of several international companies in the field of recyclable materials.
Their main area of business is biodegradable products.

We were asked to create a responsive B2B website for them. I was responsible for the UX design and also for the visual design.

Jao

B2B website

Role:

UI Design

JAO website

Responsive corporate website

## Role:

UI Design

Summary:

AO is a joint service company of twenty Transmission System Operators from seventeen countries based in Luxembourg. It mainly performs monthly and daily auctions of transmission rights on 27 borders in Europe.

We were asked to create a responsive B2B website for them. I was responsible for UI design on this project.

Other

I'm fine

Mobile application

Role:
Research, UX Design, UI Design

I'm fine

Healthcare mobile application concept
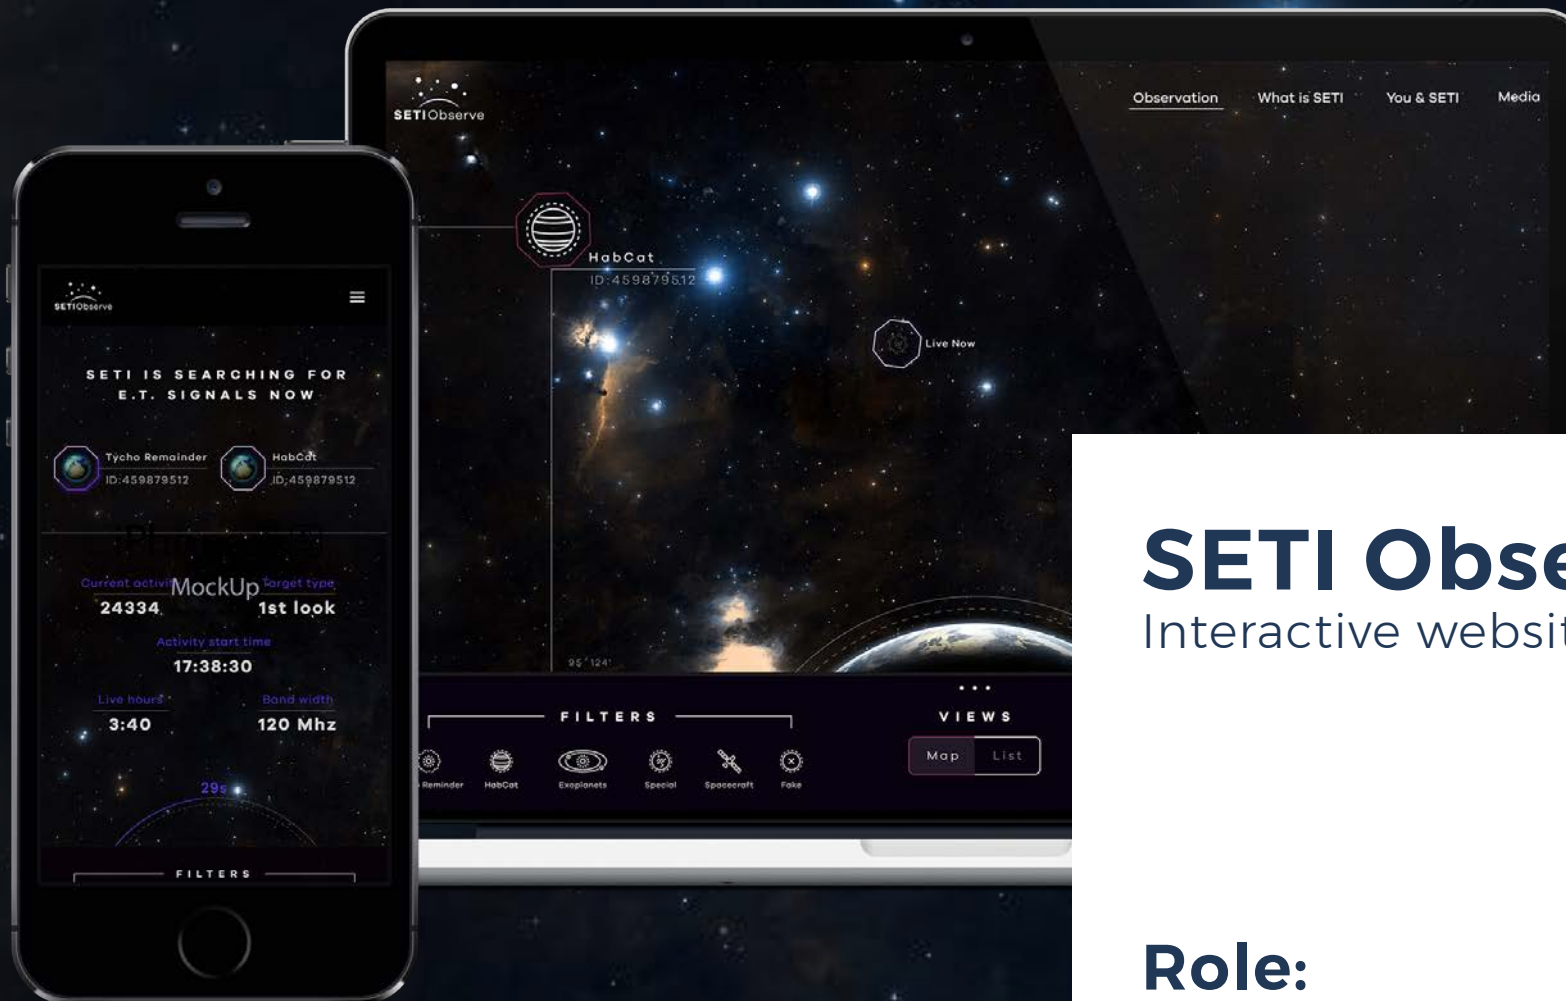

Role:

Research, UX Design, UI Design

Summary:

I'm fine is a healthcare mobile application concept. It was created to help patients participating psychological therapies. The main goal of the application is to maintain the contact between doctor and patient in between two face to face sessions. It helps the doctors to monitor the patient's well being. It also provides transparency. The patient records are online available for herself as well.

SETI Observe
Interactive website

Role:
Research, UX Design

SETI Observe
Telescope Tracker

Role:
Research, UX Design

Summary:
SETI Observe is an institute dedicated to search for extraterrestrial life forms based on the radio signal search at the Allen Telescope Array.

The main goal of this site is to keep abreast of the ET signal search effort for the interested public . Visitors can follow along, see what they are observing, and be a part of the search.
I was working alone with a team of talented visual designers on this project. My role was to set up and conduct a research plan. And to deliver the UX Design.
